REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art teaches smoking articles with a combustible material comprising ultrafine or nanoscale particles. The prior art also teaches a method of dispersing dry powder particles into the mouth of a user, in which a suction (vacuum) is created through an opening in a proximal end of an elongated housing for drawing air into a flow path in the housing from an opening in the distal end of the housing through a resistance member (filter) in the housing for introducing a controlled pressure droop in the housing and a resistance to the drawing of air in the mouth of the user. The prior art fails to teach drawing a
